## GENERAL INFORMATION

The course aims to teach musculo-skeletal ultrasound and is designed to learn the practice of standard ultrasound examinations. For that purpose, the key anatomic structures are discussed for each joint and emphasis is placed on training each participant individually in practical sessions. This is guaranteed by the presence of experienced teachers and by the limited number of participants (maximum 24) accepted for each training session. Formal lectures provide an overview of current applications.

**Accepted cat. 2, 1CP for  
ESSR DIPLOMA**
